

MINI PROJECT

Online E-book Website

Procedure to make the website-:

- First we create the signup and login page by using HTML and CSS for styling the page.
- In the page, the user can login or signup.
- Then the functionality is added using java script.

Download Books

- The user can download the pdf format of the required book by clicking on the download button below the book icon.

Books Addition

- According to daily changes we add books in our website.user can also notice us which type of book he/she want.it also better for others.

Additional Features of website-:

- A beautiful interface to interact with
- Secure browser based login and signup facility.
- Made up with only front end technologies.
